CONCERNING AMENDMENTS TO THE FEES ASSOCIATED WITH WATER POLLUTION CONTROL, AND, IN CONNECTION THEREWITH, MAKING AND REDUCING APPROPRIATIONS.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly hereby:

(a) Finds that:

(I) The division of administration in the department of public health and environment permits discharges from, and is responsible for compliance oversight of, approximately four thousand storm water construction sites annually under both the "Colorado Water Quality Control Act", article 8 of title 25, Colorado Revised Statutes, and the "Federal Water Pollution Control Act";

(II) The federal environmental protection agency (EPA) also

Capital letters indicate new material added to existing statutes; dashes through words indicate deletions from existing statutes and such material not part of act.

performs many inspections of construction sites in Colorado under the "Federal Water Pollution Control Act" as a result of the EPA's determination that the division currently is not meeting federal oversight objectives on its own, and, specifically, the EPA will continue to conduct supplemental inspections until the division has the resources to inspect at least ten percent of its storm water permits each year, or has developed an identified program to meet comparable objectives;

(III) Concerns among the regulated community about inconsistent compliance standards between federal, state, and local governmental storm water construction site inspections, the over-reliance on penalty-based enforcement to achieve compliance, and other concerns led to the passage of H.B. 12-1119, which directed the division to collaborate with the construction industry to develop more responsive and streamlined processes for preventing violations of the "Colorado Water Quality Control Act";

(IV) According to the division's "Report to the General Assembly of the State of Colorado in accordance with Colorado House Bill 12-1119", stakeholders and the division recommended developing and implementing an alternative compliance assurance model that both allows for improved targeting of enforcement resources on chronic and recalcitrant violators while encouraging and facilitating proactive compliance; and

(V) Following up on the H.B. 12-1119 report, the division held a stakeholder process in 2014 to review fees for water quality discharge permits, and that stakeholder process further defined the compliance assurance model that could be implemented by the division if the division had additional resources;

(b) Determines that it is necessary to implement certain recommended solutions from the H.B. 12-1119 report and the subsequent stakeholder processes, including increasing division inspection resources, in order to:

(I) Create a compliance assurance model that would provide a more responsive and predictable process that would increase compliance assistance through increased inspection frequency, increased individual assistance, increased compliance assistance resources, and increased communication and follow-up after inspections, and provide consideration

for first-time violators with a focus on repeat offenders; and

(II) Meet EPA oversight objectives for annual inspection rates by the division, resulting in less EPA construction site oversight in Colorado and more consistent and predictable inspection standards for permit holders; and

(c) Declares that implementation of these recommendations justifies limited fee increases as supported by the construction sector that will pay the increased fees.

SECTION 2. In Colorado Revised Statutes, 25-8-502, **repeal and reenact, with amendments**, (1); and **add** (1.1), (1.2), (1.3), (1.4), (1.5), (1.6), and (1.7) as follows:

25-8-502. Application - definitions - fees - water quality control fund - animal feeding operation fund - public participation - repeal.
